

All About Leopards

Leopards are known as big cats. They have black spots on their fur, which are sometimes rose-shaped. There are also black leopards. They have darker fur.

Leopards live in lots of different places. They can live in jungles, mountains, swamps, or grasslands. They are found in African and Asian countries, including India and China. Leopards tend to live alone, except when they are caring for their babies.

Leopards like to hunt for food at night.

They eat meat such as deer, fish, monkeys, and birds. They will watch their prey from high up in the trees where they can blend in with the leaves. Then they will pounce down to surprise their prey.
